

COMPRESSED AIR THREADED FILTERS

Walker Filtration design and manufacture in the UK a comprehensive range of silicone free compressed air and gas filtration products for use in almost every industrial environment. By using in-house research and development facilities we create high quality filtration products which satisfy the increasing demands of today's sophisticated market.

Within our standard range of threaded filters we offer 14 models with connections from 1/4" to 3". (A20-A308) offering flow capacities up to 1531 scfm (2600 Nm³/h). These models incorporate the unique Walker designed 'push on' filter element, which reduces maintenance time and allows the filter to be located in the most confined places. These filters are manufactured using die-cast aluminium housings for pressure ratings up to 16 barg (232 psig). They are a proven success due to the inclusion of such features as differential pressure indicators which allow continuous monitoring of filter performance.

TECHNICAL NOTES

1. Threaded filters are manufactured from aluminium and are PED 97/23/EC compliant.
2. Threaded connections are BSP parallel to ISO7/1 or NPT to ANSI B2.1 if supplied within North America.
3. Filter element end caps are colour coded. Direction of air flow, inside to out, through filter element.
4. Activated carbon filters must not operate in oil saturated conditions and will not remove certain types of gases including carbon monoxide and carbon dioxide.
5. Grade AC elements must be changed periodically to suit application but at least every 6 months.
6. Activated carbon towers for larger applications are available to order. Please refer to activated carbon tower leaflet.
7. Pop up indicators are supplied with models A20 (grade) and A30 (grade). Differential pressure indicators are fitted to models A55 (grade) to A308 (grade), part number 55DPIW (with the exception of grade AC). AC grade filters do not include 55DPIW differential pressure indicator.
8. Float operated automatic drain valves with manual override facility are fitted to all standard models. Semi automatic drain valves with manual override facility are fitted to all AC grade filters.
9. Mounting brackets are available for all models.
10. All filter bodies feature the Walker E-Coat™ corrosion protection as standard and are then coated with blue polyester powder paint finish.
11. Threaded filters and filter elements are suitable for use with mineral and synthetic oils plus oil free compressed air applications.
12. For larger flow application please refer to the flanged filter leaflet.
13. Threaded filters and filter elements are silicone free.

CORRECTION FACTOR

For maximum flow rate, multiply model flow rate shown in the above table by the correction factor corresponding to the working pressure.

Operating Pressure	barg	0.3	0.6	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
		psi	4	9	14.5	29	44	58	72	87	100	115	130	145	160	174	189	203	218
Correction Factor		0.21	0.29	0.38	0.53	0.65	0.76	0.84	0.92	1	1.07	1.13	1.19	1.25	1.31	1.36	1.41	1.46	1.51

COMPRESSED AIR FLANGED FILTERS

Walker Filtration design and manufacture in the UK and North America a comprehensive range of compressed air and gas filters in accordance with EN286, ASMEVIII and CRN pressure vessel standards. The range includes various model sizes with flow capacities to suit all industrial applications, high capacity filters are available upon request. Unique features of this range include stainless steel internal parts for maintenance free operation, a dual sided differential gauge for easy viewing and a side mounted drain port for permanent connection to an electronic drain or for a drain balance line. Five grades of filter elements are available and have a tie rod construction for easy replacement. The coalescing elements feature a high temperature drainage layer which is resistant to all oils including synthetic coolants. A tough corrosion resistant polyester powder coating both inside and out filter housings eliminates corrosion.

TECHNICAL NOTES

- Flanged filters are fabricated from carbon steel.
- Flanged filters are designed and manufactured in accordance with BS EN286 or ASME VIII and U Stamped for the USA, CRN approved for use within Canada.
- Flanged connections are to BS 4504 PN16, DIN2633 or ANSI 150 #RF if supplied within North America.
- Filter element bottom end caps are colour coded black and are internally threaded to ease installation. Direction of air flow, inside to out, through filter element.
- Activated carbon filters must not operate in oil saturated conditions and will not remove certain types of gases including carbon monoxide and carbon dioxide.
- Grade AC elements must be changed periodically to suit application but at least every 6 months.
- Activated carbon towers for larger applications are available to order. Please refer to activated carbon tower leaflet.
- Differential pressure indicators are fitted to all models, part number 65DPIW.
- Inlet and outlet pressure tappings are included to facilitate pressure gauge installation.
- 1/2" manual drain valves are fitted to A391 (grade) to A8810 (grade), 3/4" fitted to A10816 (grade) and A12824 (grade) as standard. An additional 1/2" side entry drain port is included on models A391 (grade) to A8810 (grade), 3/4" to A10816 (grade) and A12824 (grade).
- All filter bodies are coated inside and out with blue polyester powder paint finish to eliminate corrosion.
- Flanged filters and filter elements are suitable for use with mineral and synthetic oils plus oil free compressed air applications.
- Flanged filters and filter elements are silicone free.

CORRECTION FACTOR

For maximum flow rate, multiply model flow rate shown in the above table by the correction factor corresponding to the working pressure.

Operating pressure	barg	0.3	0.6	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
		psi	4	9	14.5	29	44	58	72	87	100	115	130	145	160	174	189	203	218
Correction factor		0.21	0.29	0.38	0.53	0.65	0.76	0.84	0.92	1	1.07	1.13	1.19	1.25	1.31	1.36	1.41	1.46	1.51
